VOLUME XXI. NUMBER 18.

LOUISA, LAWRENCE COUNTY, KENTUCKY JANUARY 5, 1906.

M. F. CONLEY, Publisher.

THE NEWS OF THE WEEK.

A Daily Resume of Important Happenings.

County Judge H. C. Smith, of Bourbon county, who retired from the office Monday, declined the unanimous tender of a gift of \$1,000 by the Fiscal Court in recognition of extra services rendered by him and for assisting in getting the new \$200,000 courthouse at Paris.

The eight-story shoe factory of Julian and Kokenzie, at Cincinnati, was destroyed by fire, at a loss of \$125,000.

White flags in Moscow mark the end of the uprising there. Those of the revolutionary leaders not in prison have surrendered and have declared their strike off. The loss of life, it seems was greatly overstated.

The first winter month has shown a falling off of results in the Kentucky oil fields. The production for 1905 will be about 1,225,000 barrels, an increase of 225,000 barrels over the output of 1904.

St. Louis, Dec. 26.—After a division of about 100 years steps were consummated in the joint session of general committees, which when formally ratified will unite the Northern Presbyterian church, U. S. A., and the Cumberland church. Almost two days have been consumed by sub-committees in arranging details for the union. Their reports were submitted to the general committees representing each church.

Washington, Dec. 30.—Members of Congress opposed to giving joint Statehood to Arizona and New Mexico are now encouraged at the outlook, and say that they believe that the bill will be beaten when it comes up to a vote in the House. Of late there has arisen a great deal of feeling over the question, and some sharp personalities have been indulged in by members of the respective sides of the controversy. Rather than "the insurgents" gain a victory, it is believed that the Republican leaders of the House will withdraw the bill or adopt a motion to indefinitely postpone the measure.

Least Gov. Thorne declared Frankfort that if his being Lieutenant Governor was keeping Gov. Beckham out of the race for United States Senator he would gladly resign. He said he favored the Governor. The Senator was confident he could be elected.

Local option cases against Dr. H. C. Kehoe, druggist, of Flemingsburg, Ky., have been compromised. Under an agreement with the Law and Order League he is to pay a fifty dollar fine and the costs in fifteen cases. In addition he is to quit business in Flemingsburg. Fifteen additional cases are docketed against him, with judgments suspended, contingent upon his compliance with the compromise agreement.

Fire at Campton, Ky., destroyed property worth \$8,000.

Lexington, Ky., Dec. 28.—John Flaherty, who shot and fatally wounded Mrs. Florence Watson at a dance at Mt. Sterling, was secretly brought to this city for safe keeping. He had been moved to Winchester, but the authorities learned of violence and the second move was deemed advisable. He declines to talk. Mrs. Watson is the wife of a telephone manager at Mt. Sterling. Flaherty had been a tutor. The shooting followed a complaint Mrs. Watson made to her husband that Flaherty had offended her.

The United States supplied more than one-half of the petroleum produced in the world in 1904. A statement of the world's production of petroleum, prepared by the British Board of Trade, which has just reached the Bureau of Statistics of the Department of Commerce and Labor, puts the petroleum production of the world in 1904 at 5,262,000,000 gallons of the world in the United States were produced in the United States.

The world production for 1904 breaks all records.

Lexington, Ky., Dec. 28.—The largest beef calf ever sold in this state was sold by manager John C. Cuff, of the Meadowbrook stud. The animal weighed 1,755 pounds, while 1,200 pounds has been the record weight for either cow or heifer.

Versailles, Ky., Dec. 28.—C. B. and Frank H. Hawkins, trustees, have sold all the walnut timber on the "Nantua Farm" of the late Col. Frank R. Harper, in this county, to Thomas H. Bradley, of Lexington. There are 225 trees, which will make probably 185,000 feet of lumber, the best of which will be exported to Germany. The price paid was \$25 to \$100 per thousand feet.

The drafting of the charter for the society which will have the control of all the Baptist colleges and schools in the State was completed by the Co-ordination Committee of the Baptist churches of Kentucky last week, and placed in the hands of the secretary, the Rev. Dr. J. J. Taylor, who will have it published and who will send copies to the interested schools for examination. The charter will then be brought before the General Association, which meets at Richmond next June, for ratification.

Lexington, Ky., Dec. 29.—A bill has been drawn and will be presented to the legislature to appropriate \$20,000 to restore the monument to Henry Clay which stands in the Lexington cemetery. The head of the monument figure was knocked off by lightning two years ago.

Secretary Wilson, of the Agricultural Department, is reported to have said that "corn is becoming too valuable to be used as food for live stock." Whereupon the wits immediately started the story that Mr. Wilson was contemplating running for office in Kentucky or asking some other favor of the descendants of Daniel Boone.

Owing to the inability of the Hon. John G. Carlisle, of counsel, to be present, oral argument before the Court of Appeals in the Berea College case, set for next Tuesday has been postponed until February 2.

Mt. Sterling, Ky., Dec. 29.—The Central Natural Gas Co., completed laying gas mains to Mt. Sterling. They will at once make all necessary connections and give a display of gas in this city in front of the courthouse and will complete the lines to Winchester and Lexington within 30 days.

Bob Hardy passed through here 27th with his clothing very badly soiled caused by the explosion of a whiskey jug.

Ed. D. Sturgill has gone to Newcomb to attend a protracted meeting.

THE FARM.

Too many farmers, and breeders of pedigreed hogs as well, says Wallace's Farmer, delay selecting the brood sows for their next year's pig crop. The best time, however, is to select the brood sow as right now before the pigs are weaned. This applies to both old sows and young ones. In the case of the old sows, mark those which have good-sized litters this spring and take good care of them. Breeding has a lot to do with the size of the litter, and the manner in which it is raised as well.

Some sows farrow good sized litters of strong pigs, but are naturally cross or nervous and kill a large percentage of the litter during the week or ten days. These are good sows to get rid of, and the sooner they are put for market the better.

Other sows seem to be natural mothers, good milkers and raise their litters with practically no loss. These are the ones to keep, and the thing to do is to mark them right now before the pigs are weaned.

ARE PUMPKINS INJURIOUS TO COWS?

A Southern farmer writes: "I have a lot of pumpkins and I want to feed them to my cows. Will they injure them? My neighbors say they will cause my cows to dry up. Your advice will be appreciated."

Pumpkins provide an excellent food for dairy cows. There is a tradition that pumpkins seeds have a very injurious effect on cows, but the experience of dairymen does not sustain the theory. Cows certainly relish pumpkins and there is no reason why the seeds should not be fed along with the fleshy part. One of the best ways to feed pumpkins is to run them through a cutting box, a root-pulper or any implement that will slice them up in thin, narrow sections. Our cow just as well cut them up with a spade, though it is a little more laborious and trying to the patience. Pumpkins can be fed on the clean soil by hauling them in wagons and throwing them down with sufficient violence to break them in good-sized pieces. There is some danger of the animals choking when fed in this way. If you stable your cows at night, you can feed the pumpkins in the manger. An excessive amount of pumpkins should not be fed, but from 15 to 20 pounds per day will not be too much.

LOOK AFTER THE LIVE STOCK.

The cold weather of January is very trying to the live stock on the farm. They need to be well housed and well fed. Cattle more than other class of live-stock suffer from the inclemency of the season and the neglect of the farmer. Sheep are partly protected by their thick fleeces; horses are usually kept in good stables; swine, herded together so as to mitigate the severity of the weather, but cattle are more often than otherwise exposed to the stinging winds and snows of winter. They need shelter, as much as horses, and it is an unexcusable cruelty for any farmer to allow his milk cows to stand in mud and water exposed to wintry winds. Cows by their milk contribute much to the comfort, the luxury and the support of the family, and they should be provided with comfortable quarters where they may be milked and fed and protected from storm and freezing weather.

CURING HAMS.

Southern hams are winning a high place among the most critical epicures of the North. The inquiry grows more frequent for them, and it is now pretty well settled that the best hams made are those from Virginia, Tennessee and Kentucky, and they are cured in the country meat-houses. How is this done? After the hams have been in salt for six weeks the hams are rubbed on the fleshy side with powdered borax to protect them from the bugs and hang up in a dark, close house, the darker the better. Ten pounds of borax will be enough for 100 pounds of meat.

After hanging for three or four days fires made of hickory wood are built on the floor of the meat-house. These fires should be warm, not hot, carrying the temperature up to say 85 degrees, and they should be kept by fire five or six weeks or more. The smoke from hickory wood gives a delicate yellowish color to the meat and makes it attractive. If the borax is not used the hams, before the ripening of the slipper flies, should be taken down from the fire poles, rubbed with freshly-powdered black pepper on the fleshy side, wrapped in paper and then encased.

The canvas covering may be dipped in a mixture made of powdered borax and water, or in the absence of this time water will answer. These exclude the air and are repellent to bugs and flies. Treated in this way, hams may be kept for many years, and are so popular they grow better and better like wine with age. It is not necessary, however, to take them down from the fire pole if they are well rubbed with borax before the advent of the fly.

A YOKER FOR OXEN.

Editor Home and Farm:

I have been a reader of Home and Farm for a long time, and like the way in which you allow the many farmers to swap ideas. I have been helped so much by your paper. I see in your paper that sub-editor wants to know the best way to make a yoke for oxen. I will give him. Go into the old field, cut down pine sapling the size you want.

It, flatten one side, which will be for the top. For under side that works on the necks let it be round, just like the tree grew; just take the bark off. Let it be thickest where the staple goes to make it strong. A yoke like this will never hurt, and is better than any other. This is the only yoke that I ever saw that is not hurt at times.

Care Of Babies.

It is a well-known fact that many babies suffer more from being overfed than from anything else. One of our readers who is an excellent authority on hygienic matters, gives me the following: When six weeks old, an infant's stomach will only hold three tablespoonsful, and from the fourth until the tenth month, about ten tablespoonsful; naturally, if more than this amount is given, the child will regurgitate part of it, one portion will be undigested, and only the amount which the stomach can digest will be taken into the system. If the child is "bottle-fed," extreme care must be taken to keep the bottles perfectly clean; no invention equals the smooth, plain bottle, fitted with a rubber nipple. The bottles supplied with long tubes are dangerous, because very few mothers take the time or care to keep them sweet and clean, which is difficult to do. Particles of milk will be left clinging to the inside of the tube, under the best of care. It is best to have several bottles, any flat, smooth bottle will do, and nipples; when not in use, they may be kept filled with water containing baking soda. They should be washed well and filled with soda water as soon as emptied or refused by the child.

It contains no opiates and is safe and sure. Mrs. George H. WELCOME WORDS TO WOMEN.

Women who suffer with disorders peculiar to their sex should write to Dr. Pierce and receive free the advice of a physician of over forty years' experience—a skilled and successful specialist in the diseases of women. Every letter has the most careful consideration and is regarded as strictly confidential. Many sensitively modest women write fully to Dr. Pierce what they would shrink from telling to their local physician. The local physician is pretty sure to say that he cannot do anything without "an examination." Dr. Pierce holds that these distasteful examinations are generally needless, and that to women, except in rare cases, should submit to them.

Dr. Pierce's treatment cures in the privacy of your home. His "Favorite Prescription" has cured hundreds of thousands of bad cases. It is the only medicine of its kind that is the product of a regularly graduated physician. Some unscrupulous medicine dealers may offer you a substitute. Don't take it. Don't trifle with your health.

Impoverished Soil

Impoverished soil, like impoverished blood, needs a proper fertilizer. A chemist by analyzing the soil can tell you what fertilizer to use for different products.

If your blood is impoverished your doctor will tell you what you need to fertilize it and give it the rich, red corpuscles that are lacking in it. It may be you need a tonic, but more likely you need a concentrated fat food, and fat is the element lacking in your system.

There is no fat food that is so easily digested and assimilated as

Attorney Enlow, of Huntington, in speaking before a gas committee in Cincinnati recently, said: "Gas experts have stated that these fields, the territory operated by the Tri State Gas Company, were the strongest in the United States; that the wells were the largest and more numerous than anywhere in the world. He said there was now an open flow of 114,000,000 cubic feet daily more than sufficient to supply Cincinnati; and there was available 70,000,000 feet more. These wells, he said, were not drawn on by any other city. As to the continuance of the flow, he cited two wells that for 20 years had given gas and were still in requisition. He said there were seven sands, and felt confident in saying that the supply would be available for Cincinnati for 50 years. He said the pipe lines would be so laid as to get a re-inforced supply from all the fields, and not merely drawn on one.

BLAINE.

During Christmas there was more whiskey than news and more song than music. No casualties, however. During the latter part of last week money was pouring into the hands of the receiver, N. T. Boggs, at his still on Corns creek. It makes us smile and smile most pleasantly to have the money chute pointed right at him.

A sad accident happened to Harmon Griffith last Friday morning while out hunting. He was going along a very steep, rocky place on the hill, when he fell losing hold on his gun. It slipped down the hill, breaching foremost ten or fifteen feet, when by some means it was discharged, the whole load striking Mr. Griffith in the left leg just below the knee, tearing the bones to fragments and lodged in the knee joint. So severe was the wound that it was necessary to have the leg taken off to save his life. Drs. H. H. and J. J. Gambill and C. C. Roberts performed the operation. It was taken off about three inches above the knee. He has our deepest sympathy.

As to Our Position.

The attention of our readers is called to the universal rule in newspaper circles that no responsibility attaches to the publisher for any statement published over the signature of the author, and that the publication of such an article does not mean it is endorsed by the publisher. The "Financial Statement" published in this issue contains personal thrusts and statements that the NEWS does not want to be understood as endorsing. The article is to be paid for and we disclaim all responsibility.

Music, vocal and instrumental, was given by the club members, and a feast of salads, fruit, mysteries, cake etc., constituted a delightful program.

A new engine and pump have been received by the Louisa Water Company and the patrons are promised a steady supply of water as soon as it is installed. The people suffered the inconvenience of the past year with comparatively little complaint, hoping all the time for better service. Fortunately, no fire has occurred during the long, dry spell and it is to be hoped that we may now have the protection for which the taxpayers of the city have been paying at the rate of 75c per year. The NEWS has all along refrained from criticism because the company seemed to be having all kinds of trouble anyway.

Henry Fischer has sent to England sixteen car-loads of pipe staves last year. This means about ten thousand dollars to be returned to this section.

Hall and one other company have sent two million barrel staves from this point and Billie's Trace during the year, and two million more will go from here in 1906. Henry Fischer has a big lot of men working on the public road above Webbville, and they are doing excellent work.

Henry Campbell is home from the head of Maine, for a few days.

City Council.

The regular monthly meeting of the present City Council was held Tuesday night. Every member was present and Mayor Snyder, ex-officio President, was in the chair. A large number of private citizens was also in attendance, but after the election of Marshal and other officers the crowd dwindled away. After a few preliminaries the Council proceeded to the election of a Marshal, city attorney, treasurer, and assessor, which resulted as follows: For Marshal, R. A. Stone; City Attorney, H. C. Sullivan; Treasurer, A. J. Garred, and assessor, W. D. Riffe. These gentlemen were all present and gave bonds.

The bondsmen of the marshal are William Justice, John Elswick, William Fulkerson, and D. C. Spencer. The compensation of the Marshal was fixed at fees, \$15 a month for keeping the street lights in order, and 50 dollars a year for ex-officio service. It is also required by ordinance, so that constantly a proper uniform and badge. Dick is an excellent officer. Reports from special committees appointed to settle with outgoing officers were read and variously disposed of. Former Marshal Boggs offered his resignation, part of which was allowed. The report of the treasurer showed that there is \$424 and a few cents in the treasury. The City Board of Supervisors made a report showing that it had raised the valuation as given by the assessor over \$17,000 and had added more than \$8,000 to the list. The stock law was informally discussed and the city attorney asked and was given time to ascertain the legal status of the City in the matter. After some talk concerning Sunday and the barber shops, stores etc., the Council adjourned.

Two more car loads of iron have been received for the Louisa and Fort Gay Bridge Company. The contractors have been missing some ideal weather for the work of construction. The contract for furnishing the flooring and other lumber needed has been let to Justice and McGuire.

There is no limit to the market for poultry and eggs in Louisa at good prices, and the farmers of this and adjoining counties should increase their production very greatly. The rails are already ready and it comes in from the outside. This is what we need to increase the prosperity of this section. Foreign money must be brought in. The people have the opportunity through this produce business. Let them improve it.

The women and children are looking after the poultry raising on most farms and they can well afford to increase their efforts along this line of profitable work.

ADAMS.
